Henry T. Mitchell

1018 MARKET ST.
PHILADELPHIA.

"HINTS." How to enable us to give you the very best and most efficient service. A benefit to you, a help to us.

SEEDS are things every one must plant who desires a Garden, whether of FLOWERS or VEGETABLES. We especially ask CUSTOMERS and OTHERS whom we have not yet had the pleasure of serving, to send us their ORDERS EARLY in the year, right after New Year's—that's when the mind is most fresh, one can remember readily what they ought to have had in the garden the past year which could have been enjoyed the past seasons, but you forgot to sow the seed. You know we've fitted up a NEW ORDER DEPARTMENT, a complete one TOO; NO OTHER one like it, we believe. An order can be filled accurately and be packed and SHIPPED when you want it; we take care of that part. We receive a great many orders, you know, and it's rather hard at times in busy season to ship the same day as received, *that's the main reason* why we want your order early. MICHELL stands for satisfaction and **BEST QUALITY**, and when we sell a thing we stand behind it, whether it's seed or supplies of any kind. This is the broad principle of our house and why we enjoy such a large patronage.

INFORMATION is what we like to give people, it's part of our business to tell you what you want to know, our corps of clerks are well trained, so you will have no trouble in being properly posted; of course, if you cannot call personally, write us for any information you may want or for special prices on large quantities, and a prompt reply from us will follow. MAIL ORDERS are taken care of in the same prompt manner as those left personally at the store.

NEW THINGS. You'll find them in the following pages. We can recommend them, as our novelties are *very* carefully selected, both in Seeds and Plants.

PRICES. We always try to maintain uniform prices throughout the season. In some instances final crop reports are not in when this catalogue goes to press, and we are compelled to charge a slight advance on certain articles of which the crop may have proved a failure. Prices on ALL FARM seeds are subject to MARKET CHANGES, but the price is never higher than the lowest for which good seeds can be SOLD. Those offered at a lower figure may not be harvested so carefully, consequently they are offered at tempting prices, "poor policy, though." In "SEEDS" the BEST are the CHEAPEST, therefore entrust your orders to us, and your gardens will be a source of satisfaction.

We ask you to kindly write your questions on a separate sheet of paper from your order, as the latter will then be filled more expeditiously and the former sure to be answered promptly.

We pay postage charges on all orders for packets of seeds (PINTS, QUARTS NOT INCLUDED), the latter should be remitted for in PAID ORDERS, viz.: for *pints of Beans, Peas, and Corn, 8c.; 15c. for quarts.* Grass Seeds may be prepaid by post for 5c. per quart, excepting Clover and Timothy, which require 8c. per pint, 15c. per quart. Packages by mail are limited to four pounds.

PACKING. This is done in first-class manner, without any expense to purchaser excepting for seamless bags for farm seeds, which are charged for at 16c. each (returnable). These strong bags are used for precaution, as the ordinary bag may tear in transit and the entire shipment lost.

IMPORTANT NOTICE.

To Gentlemen wishing the services of a Gardener. We have on our register the names of very good men who are open for positions. We will be careful to recommend only such men as would be most suitable and with best references.

To Gardeners wishing situations. We constantly have calls for first-class gardeners, and to supply such openings, we cheerfully ask gardeners who are in want of a position to apply to us, and we will endeavor to find a suitable place for good men.

We positively make no charge for this service, either to employer or employee, and exact no obligations whatever, as we consider it a strictly business matter and part of our business.

It's the reddest of all red radishes. Very early and quick to mature, growing to full size in about 22 days. Pkt. 10c., 20c. per oz.

The flowers are single and are produced in great abundance. Price, 20c. per pkt., 3 pkts. for 50c.

CARNATIONS

Flamingo

Fine brilliant Scarlet, size enormous, free bloomer, possessing no bad habits; a desirable introduction.

First prize awarded the above variety at Brooklyn, Conn., exhibition.

Indianapolis

Color an ideal pink, of the Joost type, possessing all the good qualities of the latter variety, a prominent large flower borne on a long stout stem; it seldom bursts.

Sunbird

Clear Yellow. Of the yellow carnations offered heretofore, there are none that fill the commercial want in the manner this one does—a model flower in its color, immense in size and of fine form; the freest bloomer of the yellow varieties.

Crusader

Considered to be the finest scarlet variety now on the market, commences to bloom early, continuing to do so until late in the season; fine form and large flower; never bursts its calyx; stems 30 inches long.

New Dahlia, 20th Century.

Dahlia, 20th Century

(The New Orchid-Flowered Dahlia.)

The flowers are very large, 4½ to 6 inches in diameter, sometimes reaching 7 inches; of perfect form and exquisite finish. The color is intense rosy-crimson with white tips and white disc around the yellow center as shown in the illustration; a superbly beautiful and striking flower. As the season advances, the deep colored zone becomes lighter and the color contrasts exquisitely lovely and can be compared with no other flower except the beautiful orchids. The keeping qualities are unsurpassed; the flowers cut on stems two to three feet long; keep a long time in perfect condition. The past season the cut flowers sold in the open markets at a much higher price than the finest roses. In addition to the rare beauty of the flower, it combines a sweet fragrance, making it the only fragrant dahlia worthy of the name. The plant is five feet tall, a strong, vigorous, branching grower with fern-like foliage, producing the flowers on long stems with buds and foliage. Price, strong, divided, field-grown roots, 50 cts. each; \$5.00 per dozen.

Kopf. Salad (Ger.) **Lettuce** Laitu (Fr.).

One ounce of seed will produce about 1500 plants.

For early winter use, sow the seed in September in hot beds—when large enough, thin out and transplant about 10 inches apart each way. Repeated sowings can be made during the entire season for a continuation. For outdoor, sow under glass in February and March, and transplant when large enough to open ground in March and April. As there are various kinds for the different seasons it is well to select the proper sort to insure satisfaction. When head lettuce is not desired, sow and leave stand without thinning out.

Erbesen (Ger.) **PEAS** Pois (Fr.)

ONE QUART TO 100 FEET OF ROW.

PEAS succeed best in light, dry, loamy soil. Early and dwarf sorts require richer soil than the late varieties. If manure is used, let it be old and well rotted, or there will be a rank growth of vines with few pods. Sow the early, smooth, round sorts as early in the spring as the ground can be worked. Seeds of wrinkled varieties are more liable to rot if the ground is cold, and must be planted later. Sow Peas in single rows, three feet apart, for dwarf sorts, and four for tall sorts, or in double drills, six to eight inches apart, one inch apart in the drill, and not less than four inches deep, for late sorts seven to eight inches deep. Deep planting prevents mildew. **NOTICE.**—If wanted by mail add to list price for postage, 8cts. per pint; per quart 15 cts. See also New Peas offered on Page 3.

This famous variety was sent out by us, and has given the best results wherever tried, yielding more than any other early potato; quality fine, extremely early, coming in about 1 week to 10 days earlier than Early Rose. $\frac{1}{2}$ pk. 40c., pk. 75c., bu. \$2.00, bbl. sack \$5.00.

Rural New Yorker No. 2. A very smooth-skinned sort, valuable as a cropper, for which it can not be equalled. $\frac{1}{2}$ pk. 25c., pk. 40c., bu. \$1.40, bbl. sack \$3.50.

GROWN ESPECIALLY FOR SEED PURPOSES

Plant ten bushels to the acre.

THE soil best suited to the potato is a rich, sandy loam; being a gross feeder, it requires a liberal application of manure; if stable manure is to be used it should be well rotted and not allowed to come in contact with the tubers. On no other crop are the results from the use of phosphates so manifest as on the potato; almost invariably the tubers are brighter, smoother and freer from rust and the destructive influence of wire worms. The best fertilizers are plaster, lime and bone phosphate, for heavy and wet soils especially, as they promote growth, and at the same time prevent disease. Plant as early in the spring as the ground can be thoroughly worked, in rows three feet apart and one foot in the rows.

NOTICE. Our Seed Potatoes are all Northern Grown.

Prices of Potatoes vary during the season. Write for our prices if you are a large buyer before placing your order elsewhere.

MICHELL'S SPECIAL FORMULA PERMANENT PASTURE AND HAY GRASS SEED.

This special mixture is made by us after careful study of the very best permanent, hardy varieties of grasses, such as will produce a quick growth and of a permanent nature. All the different varieties contained in this special formula are especially adapted for the purpose, and can be relied upon to give the very best results. Few farmers realize the value of sowing our **Permanent Pasture Grass Seed**, the results derived from it are remarkable. It is not an annual that must be sown every season, but a permanent turf is procured, something that will give returns for years to come. As a hay producing crop it has few equals; cattle can still graze on it after the crop has been harvested and yet find sufficient to satisfy their wants. In few words it is the **cheapest and quickest permanent crop you can put on the field**. The following grasses, properly divided in quantity, go to make up this valuable mixture: **Fancy Kentucky Blue Grass, Fancy Herd, Red Top, Meadow Fescue, English Rye, Italian Rye, Hard Fescue, Red Clover, Timothy, Alsike, Alfalfa**. (Orchard Grass can be added, if desired).

20 lbs. per bushel, \$3.00 per bu.; (5 bu. lots \$2.75 per bu.); (10 bu. lots and over at \$2.65 per bu.)

2½ bushels per acre is the proper quantity to sow on new fields, whereas one to 1½ bushels per acre is sufficient for re-sowing and replenishing old fields.

MICHELL'S Grass Seed Mixtures

WE ARE HEADQUARTERS FOR GRASS SEEDS

A good, velvety, evergreen lawn or grass plot is the richest embellishment that a house or estate could possess. Once seeded with the best grass seed that exists (Michell's Evergreen) it is permanent for years to come, although an occasional reseedling is advisable, as it keeps the lawn in the best condition. On the preceding page we illustrate a few of our most prominent mixtures or formulas of grass seed, all extensively used, every one highly recommended.

Michell's Permanent Pasture and Hay Grass Mixture A composition of varieties of grasses best suited to the purpose named. A single seeding lasts for years; may be used as a pasture one season, the next as a hay crop. Sow $2\frac{1}{2}$ bushels per acre on new land (just plowed and harrowed) or $1\frac{1}{2}$ bushels on old lands (those partially covered with grass).

Prices: 20 cents per quart; 4 quarts for 60 cents; 85 cents per peck; per bushel of 20 pounds, \$3.00; (5 bushel lots at \$2.75 per bushel.)

Michell's Shaded Lawn Grass Mixture Difficulty is frequently experienced in establishing a lawn where shade and other trees exist. This has been entirely overcome by the introduction of this fine formula. Those who have used it cannot get along without it for seeding shaded locations. Results are most gratifying. Will never fail if properly sown.

Prices: 25 cents per quart; 2 quarts for 40 cents; 4 quarts for 65 cents; \$1.00 per peck; per bushel of 20 pounds, \$4.00; (5 bushel lots at \$3.75 per bushel.) Larger quantities at \$17.50 per 100 pounds.

Michell's Lawn Grass Seed Too well known to need description. **Non-Superior Evergreen** We have a national reputation on this grass formula. The BEST LAWN GRASS SEED that exists for general use. Thousands of bushels sold annually; used by all the large estate managers, country clubs, and cemetery superintendents. A trial will convince you of its merits. Sow 4 bushels per acre on new lawn, or $2\frac{1}{2}$ bushels in reseeding old lawns.

Prices: 25 cents per quart; 2 quarts for 40 cents; 4 quarts for 65 cents; \$1.00 per peck; per bushel of 20 pounds, \$4.00; (5 bushel lots at \$3.75 per bushel.) Special prices quoted on larger quantities.

Michell's Seashore Formula Grass Seed Mixture The salt atmosphere plays havoc with the seashore lawn, and unless the proper formula of seed is sown, trouble is sure to come. Contains such grasses only as thrive best in salt air regions; no reason why you cannot have as fine a lawn at the summer resort by the sea as at the country residence. Sow 4 bushels to the acre on new ground or $2\frac{1}{2}$ bushels for reseeding old lawns.

Prices: 25 cents per quart; 2 quarts for 40 cents; 4 quarts for 65 cents; \$1.00 per peck; per bushel of 20 pounds, \$4.00; (5 bushel lots at \$3.65 per bushel.) Larger quantities at \$17.00 per 100 pounds.

Michell's Golf Course Grass Seed Mixture There's no dread of defeat on the fair greens or links where this seed is sown. No obnoxious growth to obstruct the rolling of the ball. A big boon to the lover of the golf course. Sow 5 bushels per acre.

Prices: Per bushel of 15 pounds, \$2.50; (5 bushel lots at \$2.25 per bushel.) Special prices quoted on larger quantities.

Michell's Putting Greens Mixture This is a new mixture of our own; made up especially from such grasses as will grow very short and make a solid surface to withstand heavy wear, and positively no obstruction or interruption to the rolling golf ball.

Prices: 25 cents per quart; 2 quarts for 40 cents; 4 quarts for 65 cents; \$1.00 per peck; per bushel of 20 pounds, \$4.00; (5 bushel lots at \$3.75 per bushel.) Larger quantities quoted on application.

Fairmount Park Lawn Seed. A very fine mixture indeed, meeting the requirements of those desiring a moderately priced grass seed. Sow 4 bushels to the acre on new land or $2\frac{1}{2}$ bushels on old ground.

Prices: 20 cents per quart; 2 quarts for 35 cents; 4 quarts for 50 cents; 75 cents per peck; per bushel of 15 pounds, \$2.75; (5 bushel lots at \$2.50 per bushel); per 100 pounds, \$16.00.

Lawn Tennis Grass Seed Mixture (Michell's) The game can be enjoyed much better when the proper grass is underfoot; growth is short and compact, of rich green verdure. Sow 4 bushels per acre on new lawn or $2\frac{1}{2}$ bushels on old lawns (partially covered with growth).

Prices: 25 cents per quart; 2 quarts for 40 cents; 4 quarts for 65 cents; \$1.00 per peck; per bushel of 20 pounds, \$4.00; (5 bushel lots at \$3.65 per bushel.) Larger quantities at \$17.50 per 100 pounds.

Michell's Terrace or Embankment Grass Seed Mixture A serious problem that always confronts the gardener after a rain-storm is the replacing of washed-out places in the terraced lawn. By sowing our Embankment Mixture there will be no fear of this. Compounded especially for this purpose, and will stand critical tests. Sow at the rate of 4 bushels per acre.

Prices: 25 cents per quart; 2 quarts for 40 cents; 4 quarts for 65 cents; \$1.00 per peck; per bushel of 20 pounds, \$4.00; (5 bushel lots at \$3.65 per bushel.) Larger quantities at \$17.00 per 100 pounds.

Sown with our SPECIAL GOLF COURSE FORMULA of GRASS SEED

Unsolicited Testimonial.

Cape May Golf Club, Cape May, N. J.

MR. HENRY F. MICHELL,

Dear Sir:—I think it is only just and proper that I should write you. First let me thank you for the Special Formula Seed Mixture you have sent me. My greens are the finest in this country. A gentleman from St. Andrews in Scotland, which place is always thought to have the finest greens in the known world, said mine was **far superior to them**. I can not say half enough in praise of your grass seed mixture for golf links, and which can be seen by anybody wishing to call.

Yours respectfully,

P. DWYER, Green Keeper, Cape May Golf Club.

Other Testimonials on Michell's Grass Seeds.

Your Grass Seed is certainly a most excellent mixture, producing a beautiful smooth sod in a very short time. Wherever used on the grounds here, the people are delighted with the results. I would use no other.

A. C. BROADBELT,

Supt. Media Cemetery, Media, Pa.

Send me at once, care of Adams Express,—of your **Evergreen Lawn Seed**. I bought some from you last winter; it produced the finest lawn I have ever seen.

W. H. GREEN,

Asst. to Manager of Southern Ry. Co.,
Washington, D. C.

... ABOUT LAWNS ...

Quantity of Seed to Sow per Acre.

For newly made lawns we

recommend sowing 4 bush. or 80 lbs. per acre; for renewing old lawns about 2 bush. will be sufficient. Do not be afraid to apply sufficient seed; for the young plants are but small, and if thick, cover the ground better and make a smoother and more even turf. Mowing should be done at least once a week in favorable growing weather, and even in dry weather it should be cut twice a month. Do not allow the clippings to remain on the ground, except they are very short.

How to Make One.

Some previous cultivation, or at least a thorough turning over should be given. A clayey loam is

the best foundation for a good lawn. Let the surface be graded to the level wanted in all parts and well rolled—a light raking following this will prepare for the seed sowing, which should be done as early in the spring as the ground can be worked, provided the ground has not already been prepared in the fall. The very best time, the ground being in order, is about April 1st.

The Grounds around the Buildings at the ST. LOUIS EXPOSITION will be seeded with MICHELL'S EVERGREEN LAWN GRASS SEED.

FRINGED PERPETUAL BLOOMING "ALLEGHENY"

(Semi-Double.)

Blooms the first season from seed if sown early. Its points of merit are: The novel shape of the flower and the fringed edges, and its large size, from 5 in. to 7 in. diameter. In addition hereto, the color is something fine, and the appearance of the petals convey the idea that they were made of crushed silk, on account of the delicate colors. The immunity from disease is a good point, and the fact that at each axis are 3 to 4 buds, which all develop, is also a good point; this prolongs the blooming season. They come 90 per cent. true from seed.

LAWN MOWER SHARPENING

The many demands we had for this kind of work has necessitated us taking it up as part of our business. We are pleased to announce we are prepared to do the above work in a most thorough manner.

When sending us mowers to sharpen or repair, please put a tag on them bearing your name, as so many are sent us they are apt to become mixed in our shop, and you possibly might get the wrong machine.

Coldwell's New Motor Lawn Mower.

Coldwell's Motor Lawn Mower

Is especially adapted for use on Parks and Golf Grounds, the latter of which it is especially recommended for, as its great weight and fineness of cut, leaves the ground in the very best condition for the game.

As a STEAM ROLLER FOR LAWNS it has no equal; its weight is just right for this work. When so used the lawn mower part is lifted by means of a lever and left suspended free from the ground.

The Motor (8-horse power), of the latest improved design, is the same as is used on an up-to-date automobile.

The machine complete and ready for operation weighs about 3,000 pounds. It cuts a swath 40 inches wide, and travels at the rate of from 250 to 500 feet per minute over any ordinary grade.

As a PORTABLE ENGINE to be used for pumping water, sawing wood, etc., it is perfect.

Considering the amount, quality and variety of work this machine will do, we consider it the most economical machine that can be used on a large place.

We guarantee that a man can do as much cutting with this machine in a single day as can be done with two or three Horse Mowers in the same time.

"PLANET JR." FARM AND GARDEN TOOLS

Space will not permit our showing and describing all of the "Planet Jr." tools, but we will send a fully illustrated catalogue free for the asking to any who desire it. "Planet Jr." goods are standard machines; the best—yet improvements and new tools have been made for 1904. You can rely on getting a bottom price from us on "Planet Jr." tools.

"PLANET JR." No. 3, Hill Dropping Seed Drill.

We all know that a seed sower that does not drop in hills is fast becoming a thing of the past. Why? Because all crops that are to be grown from seed and thinned to a regular stand should be planted in hills at just the distance apart the plants are desired; for in drilling, unless the seed is sown unnecessarily thick, there will not always be a plant at the proper spot, and the crop is therefore irregular. This means that a seed sower should drop in hills, and at various distances. The new No. 3 "Planet Jr." drops at 4, 6, 8, 12 and 24 inches apart, and also in a continuous row, without injury to the seed and can be changed from hill to drill instantly, or from one distance to another very quickly. The index is at the top of the handle, with hair breadth adjustment and instantaneous cut-off.

"PLANET JR." No. 4 Combined Hill Dropping Seeder and Single Wheel Hoe.

This is exactly the same style of seeder as No. 3 "Planet Jr." Hill Dropper. It is smaller in capacity, though still of good size, holding two quarts. It drops in hills at 4, 6, 8, 12 and 24 inches apart and in drills any thickness, handling the smallest paper of seed perfectly, and is simple, durable and very light running. Throws out of gear instantly by simply raising the handles. The drill is detached and the tool frame substituted by moving but one bolt. It then becomes one of the most admirable Single Wheel Hoes of the "Planet Jr." family.

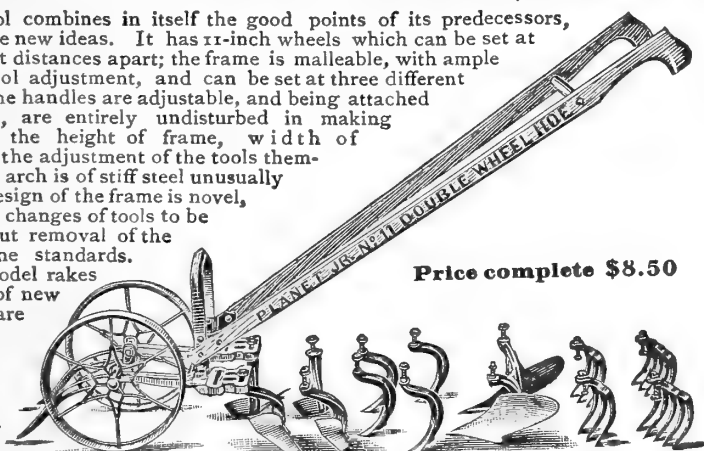

Price complete \$10.00.

Drill only

"PLANET JR." No. 11 Double Wheel Hoe, Cultivator, Rake and Plow

This tool combines in itself the good points of its predecessors, with valuable new ideas. It has 11-inch wheels which can be set at four different distances apart; the frame is malleable, with ample room for tool adjustment, and can be set at three different heights. The handles are adjustable, and being attached to the arch, are entirely undisturbed in making changes of the height of frame, width of wheels or in the adjustment of the tools themselves. The arch is of stiff steel unusually high. The design of the frame is novel, allowing all changes of tools to be made without removal of the nuts from the standards. A pair of model rakes and a pair of new style hoes are added to the usual equipment—seven pairs of tools in all. The variety of the work possible with this machine is incredible, covering the whole range of wheel hoe work, both in the garden and on the farm, and has our unqualified endorsement.

Price complete \$8.50

"PLANET JR." No. 12 Double Wheel Hoe.

This tool is identical with No. 11 except that it has a less complete equipment, as shown in the cut, but at a correspondingly less price. The set of tools with No. 12 is what gardeners need most.

Price \$6.50

The "PLANET JR." No. 13 Double Wheel Hoe

This tool is the No. 11 with 6-inch hoes only, this pair of tools being most general and useful at all seasons. Any or all of the No. 11 tools may be added at any time, and are sure to fit. Price \$4.50.

"PLANET JR." No. 8 Horse Hoe.

Price as in cut \$8.00.

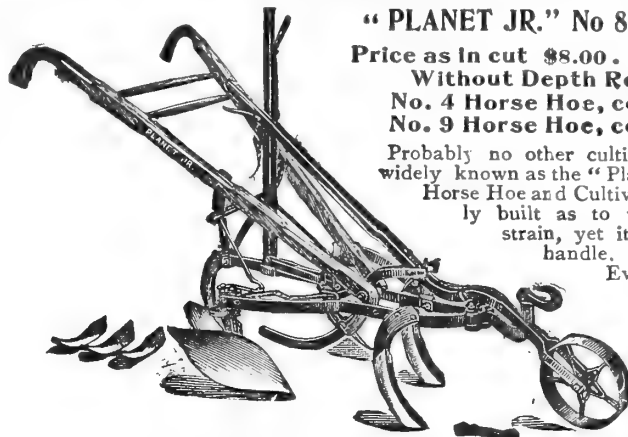

Without Depth Regulator \$7.50.

No. 4 Horse Hoe, complete \$6.00.

No. 9 Horse Hoe, complete \$7.00.

Probably no other cultivating machine is so widely known as the "Planet Jr." Combined Horse Hoe and Cultivator. It is so strongly built as to withstand incredible strain, yet it is light and easy to handle.

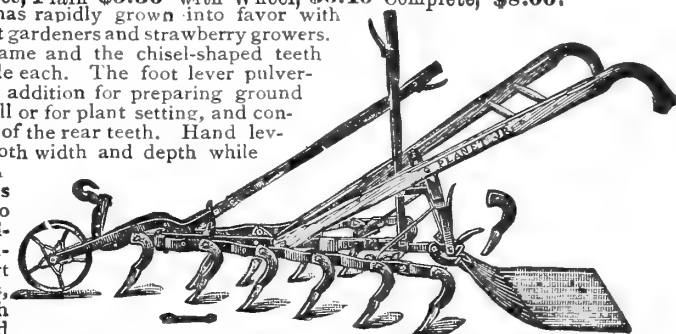

Every part is perfected to make the tool comprehensive to the intelligent farmer, who knows the best is always the cheapest.

"PLANET JR." Harrow and Cultivator.

Price, Plain \$5.30 with Wheel, \$6.40 Complete, \$8.00.

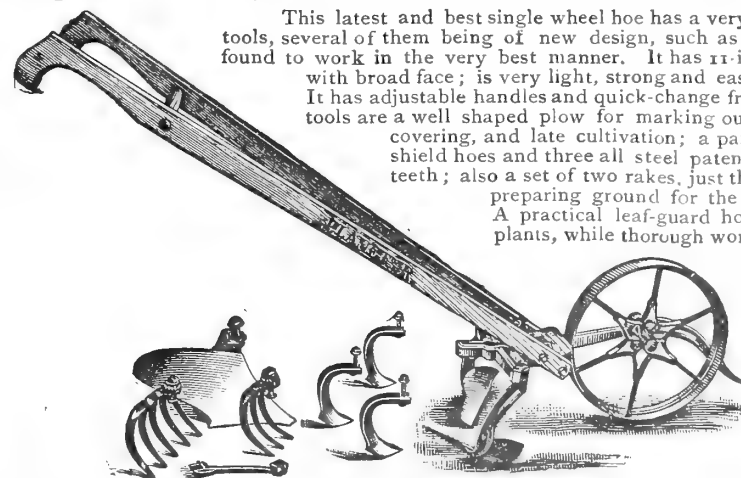

This tool has rapidly grown into favor with farmers, market gardeners and strawberry growers. It has a high frame and the chisel-shaped teeth cut an inch wide each. The foot lever pulverizer is a capital addition for preparing ground for the seed drill or for plant setting, and controls the depth of the rear teeth. Hand levers regulate both width and depth while in motion; it contracts 22 inches and expands to 32 inches. It cultivates deep without throwing dirt upon the plants, and the smooth round-throated teeth turn strawberry runners without injuring them. For cutting strawberry runners we make a special attachment, consisting of a ten-inch flat steel disc mounted on an outrigger. Strawberry Runner Cutter Attachment extra \$1.60.

"Planet Jr." No. 16

Single Wheel Hoe, Cultivator, Rake and Plow. Price, \$5.50.

This latest and best single wheel hoe has a very full set of tools, several of them being of new design, such as have been found to work in the very best manner. It has 11-inch wheel, with broad face; is very light, strong and easy running. It has adjustable handles and quick-change frame. The tools are a well shaped plow for marking out, plowing, covering, and late cultivation; a pair of 6-inch shield hoes and three all steel patent cultivator teeth; also a set of two rakes, just the thing for preparing ground for the seed drill. A practical leaf-guard holds up the plants, while thorough work is being

done underneath: the frame changes in height, and the wheel may be attached to the other side of the frame, when both sides of the row may be hoed at one passage.

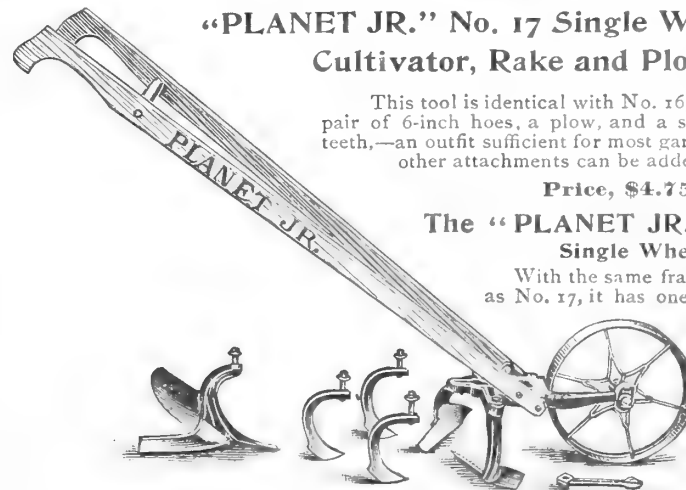

"PLANET JR." No. 17 Single Wheel Hoe, Cultivator, Rake and Plow.

This tool is identical with No. 16, but has only a pair of 6-inch hoes, a plow, and a set of cultivator teeth—an outfit sufficient for most garden work. The other attachments can be added at any time.

Price, \$4.75.

The "PLANET JR." No. 18 Single Wheel Hoe.

With the same frame and handles as No. 17, it has one pair of 6-inch

hoes only, but they are the most constantly useful through the season of all the list. The remainder you buy as wanted. Price, \$3.25.

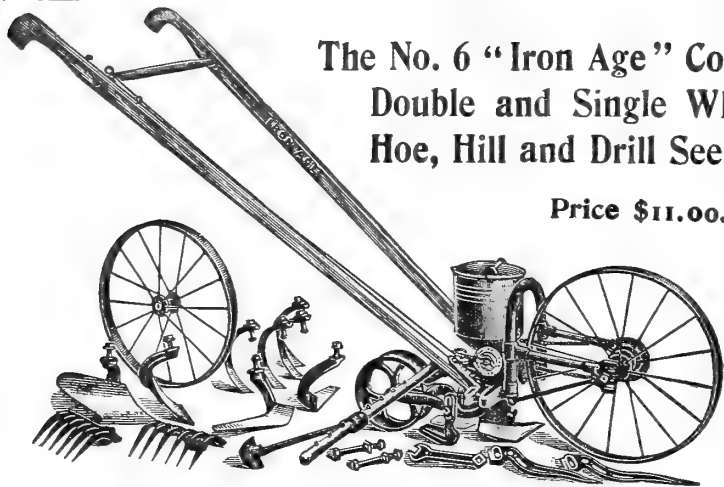

The "FIRE-FLY PLOW."

This tool is invaluable for those having small gardens. The mould-board is tempered and polished steel. The depth may be changed very quickly. Price, \$2.25.

HENRY F. MICHELL,

Dear Sir,—In reply to your inquiry about the Cornell Incubator purchased of you, it has given the best of satisfaction, it was run in competition with the other makes of incubators in order to determine which would be best before placing our final order. In every hatch the "Cornell" gave the largest percentage, the chicks were stronger and hardier. The last hatch, which was run under unfavorable circumstances, gave 152 chicks out of 171 fertile eggs. As a result of our comparison we have decided to place our order for Cornell Incubators exclusively.

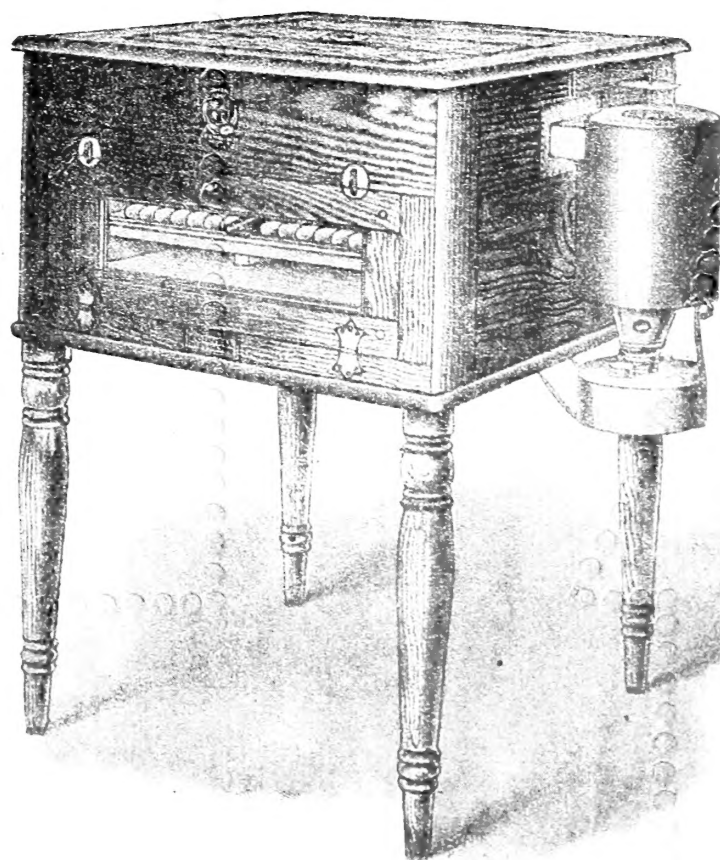

Yours truly,
